Rovixim 100 Oral Suspension

Cefixime 100 mg Dry Syrup

Cefixime 100 mg Dry Syrup is a third-generation cephalosporin antibiotic widely used for treating bacterial infections in children. Rovixim 100 Dry Syrup contains Cefixime Trihydrate IP equivalent to Cefixime Anhydrous 100 mg per 5 ml after reconstitution.

Composition:

- Each 5 ml of the reconstituted suspension contains:
- Cefixime Trihydrate IP equivalent to Cefixime Anhydrous 100 mg

Indications & Uses:

- Upper & Lower Respiratory Tract Infections
- Acute Otitis Media
- Urinary Tract Infections
- Typhoid Fever (as prescribed)
- Pharyngitis & Tonsillitis
- Genito-Urinary Infections
- Septicemia & Intra-Abdominal Infections
- Surgical Prophylaxis

Mechanism of Action:

Cefixime inhibits bacterial cell wall synthesis by binding to penicillin-binding proteins (PBPs), leading to bacterial cell death and effective infection control.

Dosage (Pediatric):

Usual dose: 8 mg/kg/day once daily or divided into two doses for 5–14 days as directed by physician.

Common Side Effects:

- Diarrhea
- Nausea

- Abdominal pain
- Mild skin rash

Storage Instructions:

- Store below 25°C
- Protect from moisture and sunlight
- Use within recommended period after reconstitution
- Keep out of reach of children

Cefixime 100 mg price – Rovixim 100 Dry Syrup (MRP): 75.00

Expert Advice:

Administer exactly as prescribed. Do not skip doses or discontinue prematurely. Complete the full course to prevent antibiotic resistance. Shake well before use.

Rovixim 100 Dry Syrup by GREEN CROSS REMEDIES is manufactured in a WHO-GMP certified facility, ensuring consistent quality and dependable therapeutic outcomes.
