## Clonazepam 0.25 Tablet Uses – Clops 0.25 MD Tablet

Clonazepam 0.25 tablet uses are widely recognized in clinical practice for managing anxiety disorders, panic attacks, sleep-related problems, and seizure disorders.

Clops 0.25 MD Tablet is a low-dose mouth dissolving clonazepam formulation designed for dose-sensitive patients, elderly individuals, and gradual titration therapy. Manufactured by Green Cross Remedies, it offers fast action, ease of use, and reliable therapeutic outcomes.

### Composition

Clonazepam I.P. – 0.25 mg  
Excipients q.s.

### Uses & Indications

- Anxiety disorders and stress-related conditions
- Panic attacks and panic disorder
- Sleep disturbances linked to anxiety
- Seizure disorders including epilepsy
- Adjunct therapy in neurological conditions

### Mechanism of Action

Clonazepam enhances the activity of GABA, an inhibitory neurotransmitter in the brain, helping calm excessive nerve activity. It produces anxiolytic, sedative, muscle-relaxant, and anticonvulsant effects. The mouth dissolving formulation supports faster absorption and therapeutic response.

### Dosage & Administration

- Dosage should be individualized as per medical advice
- Place the tablet on the tongue and allow it to dissolve
- Do not chew or swallow whole
- Do not discontinue abruptly without doctor supervision

### Possible Side Effects

- Drowsiness
- Dizziness
- Fatigue
- Reduced alertness
- Rare: mood changes or respiratory depression

## Contraindications & Precautions

- Hypersensitivity to benzodiazepines
- Severe liver impairment
- Respiratory insufficiency
- History of drug dependence
- Use cautiously in elderly, pregnant women, and depressed patients

## Drug Interactions

- Alcohol
- Antidepressants
- Opioid pain medications
- Other sedatives or sleeping pills

## Storage Instructions

- Store below 25°C
- Protect from moisture and light
- Keep out of reach of children

**MRP: ■27.84**

## Expert Advice

Take clonazepam strictly as prescribed. Avoid alcohol during treatment. Do not self-medicate or share medication. Regular follow-up ensures safe and effective therapy.
