

# OFFRY BC Ear Drops

## Clotrimazole & Lignocaine Ear Drops

OFFRY BC Ear Drops are a clinically effective antifungal ear formulation designed to treat fungal ear infections while providing fast relief from pain, itching, and irritation.

### **Key Composition**

**Clotrimazole IP 1% w/v** – Broad-spectrum antifungal

**Lignocaine HCl IP 2% w/v** – Local anesthetic for rapid pain relief

### **Why OFFRY BC?**

- Dual-action antifungal and analgesic formulation
- Rapid relief from pain, itching, and irritation
- Effective against common fungal ear pathogens
- Improves patient comfort and compliance
- Manufactured in a WHO-GMP certified facility

### **Therapeutic Uses**

Indicated for otomycosis, fungal otitis externa, and ear itching due to fungal infections.

### **Mechanism of Action**

Clotrimazole damages the fungal cell membrane by inhibiting ergosterol synthesis, while lignocaine provides local pain relief by blocking nerve impulses.

### **Dosage & Administration**

Instill 2–3 drops into the affected ear, 2–3 times daily or as prescribed by the physician. For external ear use only.

### **Contraindications**

Hypersensitivity to ingredients, suspected perforated eardrum, or use without medical advice in children.

### **Storage Instructions**

Store below 25°C. Protect from light and moisture. Keep out of reach of children.

**OFFRY BC Ear Drops by Green Cross Remedies** are a dependable antifungal solution manufactured in a WHO-GMP certified facility, ensuring quality, safety, and consistent therapeutic outcomes.
