

CRONET PLUS Tablet

Doxylamine Succinate, Pyridoxine Hydrochloride & Folic Acid Tablets

COMPOSITION

Each Enteric Coated Tablet Contains:
Doxylamine Succinate USP10 mg
Pyridoxine HCL10 mg
Folic Acid IP2.5 mg

Doxylamine succinate, pyridoxine hydrochloride, and folic acid tablets support maternal wellness and help improve nutritional balance during pregnancy. Pregnancy-related nausea and vomiting are among the most common concerns experienced by women during the first trimester. **CRONET PLUS Tablet** is specially formulated to help manage pregnancy morning sickness and provide effective relief from nausea, vomiting, and discomfort associated with early pregnancy.

CRONET PLUS Tablet is a specialized formulation from **Green Cross Remedies**. Designed to alleviate nausea and vomiting during pregnancy, this product supports maternal health with essential vitamins.

Product Overview

CRONET PLUS Tablet is a pharmaceutical product by Green Cross Remedies, formulated to manage nausea and vomiting associated with pregnancy. This proprietary blend includes:

- **Doxylamine Succinate (10 mg):** An antihistamine that helps reduce symptoms of nausea and vomiting.
- **Pyridoxine (Vitamin B6, 10 mg):** Essential for the normal functioning of the nervous system and helps alleviate nausea.
- **Folic Acid (2.5 mg):** Vital for fetal development and helps prevent neural tube defects.

Indications

- Pregnancy morning sickness
- Nausea and vomiting in pregnancy
- Morning sickness treatment
- Prenatal nausea relief
- Pregnancy nausea & vomiting medicine
- Folic acid supplementation during pregnancy

These tablets are especially useful for women experiencing persistent nausea in the first trimester.

Mechanism of Action

The combination works through multiple therapeutic actions:

- **Doxylamine Succinate:** An antihistamine that helps reduce nausea signals in the brain and controls vomiting associated with pregnancy.
- **Pyridoxine Hydrochloride:** Plays an important role in reducing pregnancy-related nausea and improving metabolic balance.
- **Folic Acid:** Supports fetal neural development and helps prevent folate deficiency during pregnancy.

Together, these components provide comprehensive support for women dealing with pregnancy nausea and vomiting.

Uses of CRONET PLUS

CRONET PLUS is widely recommended for managing vomiting during pregnancy.

- **Management of Nausea & Vomiting:** Primarily used to alleviate morning sickness. The combination of Doxylamine and Pyridoxine helps reduce these symptoms effectively.
- **Nutritional Support:** Folic Acid supports fetal development. Pyridoxine supports overall maternal health.
- **Symptomatic Relief:** Provides relief from nausea

due to various causes, maintaining a healthier daily routine.

- **Adjunct Therapy & Supplementation:** Enhances

overall effectiveness when combined with dietary changes and contributes to the health of the mother and fetus.

Dosage and Administration

The dosage of CRONET PLUS Tablet should always be taken as advised by a healthcare professional.

- Usually taken once or twice daily.
- Preferably taken on an empty stomach or as directed by the physician.
- Swallow whole without crushing or chewing.

Dosage may vary depending on the severity of symptoms and patient response.

Benefits

- Helps control nausea and vomiting in pregnancy.
- Provides effective relief from morning sickness.
- Supports maternal nutritional health & folic acid levels.
- Convenient enteric-coated tablets.
- Supports healthy fetal development.

Considered among the best medicine for vomiting in pregnancy when used under medical supervision.

Side Effects

Like all medicines, it may cause some mild, manageable side effects in certain individuals:

- Drowsiness or Dizziness

Expert Advice

CRONET PLUS Tablet should always be taken exactly as prescribed. Do not discontinue therapy prematurely. Proper adherence helps achieve better symptom control. Maintain adequate hydration, consume small frequent meals, and avoid nausea triggers. Because doxylamine may cause drowsiness, avoid activities requiring mental alertness. If severe allergic reactions occur (swelling, breathing difficulty, rash), discontinue and seek immediate medical attention.

Frequently Asked Questions (FAQs)

Q: Is doxylamine safe during pregnancy?

A: When prescribed by a doctor, doxylamine succinate tablets are considered safe and effective for pregnancy nausea relief.

Q: What is the use of pyridoxine and folic acid in pregnancy?

A: Pyridoxine helps reduce nausea and supports healthy metabolism. Folic acid supports fetal development and maternal nutrition, complementing anti-nausea therapy.

- Dry mouth
- Fatigue
- Constipation or mild stomach discomfort

Consult a doctor if symptoms persist or worsen.

Contraindications & Precautions

Use cautiously in patients with hypersensitivity, severe liver disorders, glaucoma, respiratory disorders, or severe dehydration.

- Avoid driving or operating machinery (may cause sleepiness).
- Avoid alcohol consumption during therapy.
- Use only under medical supervision during pregnancy.
- Never self-medicate prenatal tablets.

Drug Interactions

May interact with sedatives, CNS depressants, alcohol, antihistamines, and certain antidepressants. Always disclose complete medication history.

Storage & Packaging

- Store in a cool, dry place below 25°C.
- Protect from moisture and direct sunlight.
- **MRP:** 56.00 / 10 Tablets.

Q: Which company manufactures CRONET PLUS Tablet?

A: CRONET PLUS Tablet is manufactured by **Green Cross Remedies**, a trusted pharmaceutical company known for quality pregnancy care medicines and innovative healthcare formulations. Manufactured in quality-controlled facilities, it ensures consistent efficacy, safety, and dependable therapeutic outcomes.
