

EROMID MDF Tablet

Metronidazole, Furazolidone & Dicyclomine Hydrochloride Tablets

Effective Diarrhea Relief & Gut Health

EROMID MDF Tablet is a powerful combination medicine designed to treat diarrhea, intestinal infections, and associated abdominal pain. It combines Metronidazole, Furazolidone, and Dicyclomine Hydrochloride, offering anti-protozoal, antibacterial, and antispasmodic benefits. This formulation is highly effective in treating both the infection and the physical spasms of the gastrointestinal tract.

Composition

Each tablet contains:

- **Metronidazole IP:** 200 mg (Antibacterial/Anti-protozoal)
- **Furazolidone IP:** 50 mg (Broad-spectrum Antimicrobial)
- **Dicyclomine Hydrochloride IP:** 10 mg (Antispasmodic)

Indications & Uses

- Acute diarrhea and loose motion.
- Amoebic dysentery and mixed gut infections.
- Bacterial and protozoal infections of the gastrointestinal tract.
- Abdominal cramps and spasms (IBS-related).
- Treatment of *Helicobacter Pylori* infections and traveler's diarrhea.

Mechanism of Action

- **Metronidazole:** Acts against anaerobic bacteria and protozoa by inhibiting nucleic acid synthesis, leading to microbial cell death.
- **Furazolidone:** Interferes with bacterial metabolism to effectively kill harmful intestinal pathogens.
- **Dicyclomine:** Relaxes smooth muscles in the gastrointestinal tract, reducing painful spasms and urgency.

Dosage & Administration

- **Standard Dosage:** 1 tablet 2–3 times daily or as prescribed by a physician.
- **Administration:** Take after meals to reduce potential gastric irritation.
- **Compliance:** Complete the full course of treatment to prevent infection recurrence.

Frequently Asked Questions (FAQs)

Q: What is EROMID MDF used for?

A: It treats diarrhea, intestinal infections, and abdominal cramps by killing pathogens and relaxing gut muscles.

Q: Is dicyclomine safe for stomach pain?

A: Yes, it is a proven antispasmodic that relieves muscle spasms when used as prescribed.

Q: Can I take this without a prescription?

A: No, this is a prescription medication and should only be taken under guidance.

Q: How many days should I take this tablet?

A: Usually 3–5 days, but always follow your doctor's specific instructions.

Expert Medical Advice

- Maintain adequate hydration with ORS, especially in severe diarrhea cases.
- Avoid skipping doses; incomplete therapy contributes to antimicrobial resistance.
- If symptoms persist or severe allergic reactions occur, seek immediate medical attention.
