RIDE NC Cream

Beclomethasone Dipropionate, Clotrimazole and Neomycin Cream

Overview

RIDE NC Cream is a clinically trusted, premium formulation from **Green Cross Remedies**, designed for the comprehensive management of inflammatory skin infections. It works as a broad-spectrum antifungal, antibacterial, and anti-inflammatory solution, making it ideal for treating conditions like ringworm, dermatitis, and infected eczema.

This triple-combination cream provides fast relief from fungal skin infections, itching, redness, and inflammation.

Composition

Each gram of cream contains:

- **Beclomethasone Dipropionate (0.025% w/w):** A corticosteroid that alleviates inflammation, redness, and itching.
- **Neomycin Sulphate (0.50% w/w):** An antibiotic that targets and prevents secondary bacterial infections.
- **Clotrimazole (1.0% w/w):** A broad-spectrum antifungal agent effective against various fungal pathogens.

Key Uses & Indications

RIDE NC Cream is widely prescribed for:

- **Fungal Skin Infections:** Tinea corporis (ringworm), Tinea pedis (athlete's foot), Tinea cruris (jock itch).
- **Bacterial Infections:** Superficial skin infections caused by susceptible bacteria.
- **Inflammatory Disorders:** Dermatitis and eczema requiring topical corticosteroid treatment to alleviate swelling and irritation.
- Relief from intense itching, redness, and rashes with mixed fungal and bacterial conditions.

Dosage & Administration

- Apply a thin layer to the affected area 1-2 times daily or as directed by a physician.
- Clean and dry the area before application.
- Do not cover with airtight dressings unless medically advised.

Side Effects & Precautions

Like all medications, this steroid-antifungal cream may cause mild side effects such as skin irritation, a burning sensation, dryness, or redness.

- **Contraindications:** Avoid use in viral infections like herpes or chickenpox. Not recommended for untreated bacterial infections without supervision.
- **Precautions:** Avoid prolonged use on the face and use cautiously in children. Avoid applying near the eyes, mouth, or open wounds.

Drug Interactions

Topical interactions are rare, but caution is advised when used with other steroid-containing creams or strong topical medications. Consult a doctor before combining treatments.

Storage & Packaging

- **Storage:** Store below 25°C. Keep away from direct sunlight and moisture. Keep out of reach of children.
- **Price:** MRP Rs. 70.00 for a 15 gm tube.

Expert Advice

Always use exactly as prescribed by a healthcare professional. Avoid overuse, as misuse of topical corticosteroids may lead to skin thinning. Do not discontinue treatment prematurely, even if symptoms improve, to prevent recurrence. Maintain proper hygiene and keep the affected area clean and dry.

Frequently Asked Questions

Can I use this cream for itching in private parts?

Yes, but only under medical supervision when a mixed infection is involved.

Does this cure ringworm permanently?

It treats infections effectively, but the full prescribed duration must be completed.

Can this cream be used on the face?

Use on the face only if explicitly prescribed, as prolonged use may damage delicate skin.

How long does it take to work?

Improvement is usually seen within 3–7 days, depending on severity.
