MEFCOLIC DP TABLET

Dicyclomine Hydrochloride and Paracetamol Tablets

Dicyclomine hydrochloride and paracetamol tablets uses is essential for effective management of abdominal pain and spasms. **Mefcolic DP Tablet** combines an antispasmodic tablet with an analgesic to provide rapid and sustained relief from stomach pain, cramps, and discomfort.

Mefcolic DP Tablet combines Dicyclomine (10 mg) and Paracetamol (325 mg) to provide effective relief from abdominal pain and discomfort. This synergistic formulation helps alleviate spasms and reduce pain, making it suitable for various gastrointestinal conditions.

This combination is widely prescribed as an abdominal pain relief medicine, period pain relief tablet, and IBS pain medicine, making it highly useful in gastrointestinal and menstrual conditions. Dicyclomine is also known as Dicycloverine.

Composition

Each tablet contains:

Dicyclomine Hydrochloride – 10 mg

Paracetamol – 325 mg

This dicyclomine hydrochloride 10 mg paracetamol 325 mg tablet offers dual-action relief from pain and spasms.

Uses

The **dicyclomine hydrochloride and paracetamol tablets uses** include:

- Relief from abdominal cramps and spasms
- Treatment of irritable bowel syndrome (IBS) pain
- Management of menstrual cramps (Period Pain)
- Relief from colic pain and intestinal spasms
- Treatment of stomach pain and gas-related discomfort

It is considered a reliable stomach pain medicine and cramp relief medicine for adults.

Indications

This antispasmodic and analgesic combination is indicated in:

- **Abdominal Pain Relief:** Effective in alleviating mild to moderate abdominal pain caused by various gastrointestinal conditions.
- **Management of Gastrointestinal Spasms:** Dicyclomine helps relax the muscles in the gastrointestinal tract.
- **Irritable Bowel Syndrome (IBS):** Provides symptomatic relief from abdominal cramps and discomfort.
- **Menstrual Cramps:** Alleviates pain associated with dysmenorrhea (menstrual cramps).

- **Post-Operative Pain:** Can be used to manage pain and discomfort following abdominal surgeries.
- **Fever Reduction:** Paracetamol has antipyretic properties.
- **Colicky pain conditions.**

It is often prescribed as one of the best tablets for stomach pain and cramps.

Dosage

- Usually 1 tablet 2–3 times daily or as prescribed.
- Take after meals to avoid gastric discomfort.
- Do not exceed recommended dosage.

The dicyclomine and paracetamol tablet dosage for adults depends on severity and medical advice.

Mechanism of Action

- **Dicyclomine** acts as an anticholinergic agent, relaxing the smooth muscles of the gastrointestinal tract, which helps relieve spasms.
- **Paracetamol** provides analgesic and antipyretic effects, reducing pain and fever by acting on the central nervous system.

This combination provides quick and effective pain relief.

Side Effects

Common side effects may include:

- Dry mouth
- Dizziness
- Nausea
- Blurred vision
- Mild drowsiness

These are usually mild and temporary.

Contraindications & Precautions

- Hypersensitivity to any component.
- Glaucoma or urinary retention.
- Severe liver disease (due to paracetamol).
- Use cautiously in elderly patients.

Always assess side effects before use.

Drug Interactions

- Avoid alcohol (increases liver risk).
- Caution with other anticholinergic drugs.
- Inform doctor about ongoing medications.

Storage Instructions

- Store below 25°C in a dry place.
- Protect from sunlight.
- Keep out of reach of children.

Pricing: Dicyclomine Hydrochloride and Paracetamol Tablet price - **Mefcolic DP Tablet (MRP): Rs. 46.60**

Expert Advice for Mefcolic DP Tablet

- Dicyclomine hydrochloride and paracetamol tablets should always be taken exactly as prescribed by a healthcare professional.
- Avoid exceeding the recommended dose, as high doses of paracetamol may lead to liver damage.
- To achieve optimal therapeutic outcomes, patients should strictly follow the dosage schedule and avoid skipping doses. Do not self-medicate or share this medicine with others.
- Take the tablet after food to minimize gastric discomfort.
- Avoid alcohol consumption while taking this medication, as it may increase the risk of liver toxicity and side effects such as dizziness.
- Maintain proper hydration and consult your doctor if symptoms persist or worsen.
- Discontinue use and seek medical attention immediately if you experience allergic reactions such as rash, swelling, or breathing difficulty. Patients with chronic gastrointestinal disorders should use this medicine under medical supervision.
