

Megimine-2500 Injection: Vitamin B12 (Methylcobalamin) 2500 mcg Injection

Megimine-2500 Injection is a high-strength Vitamin B12 injection containing Methylcobalamin 2500 mcg. Methylcobalamin is the active and natural form of Vitamin B12 that is easily absorbed and used by the body. This injection is manufactured by Green Cross Remedies and is used to treat Vitamin B12 deficiency and related health problems. Vitamin B12 is essential for healthy nerves, red blood cell formation, and proper brain function.

Uses

Megimine-2500 Injection is mainly used to treat Vitamin B12 deficiency. It is also helpful in conditions such as diabetic neuropathy, peripheral neuropathy, nerve pain, and anemia caused by low Vitamin B12 levels. This injection supports nerve repair and helps reduce symptoms like weakness, fatigue, numbness, tingling, and loss of sensation. Doctors may also prescribe it to patients who have difficulty absorbing Vitamin B12 due to stomach or intestinal problems.

Dosage

The dosage of Megimine-2500 Injection should always be decided by a doctor. The dose depends on the patient's age, medical condition, and severity of deficiency. In most cases, one injection is given one or two times per week, or as advised by the physician. Do not self-inject or change the dosage without medical advice.

Side Effects

Megimine-2500 Injection is generally safe and well tolerated. Some patients may experience mild side effects such as pain, redness, or swelling at the injection site. Rarely, headache, nausea, or mild stomach discomfort may occur. Serious allergic reactions are very rare, but if symptoms like rash, itching, or breathing difficulty appear, medical help should be taken immediately.

Storage

Store Megimine-2500 Injection in a cool and dry place. Protect it from direct sunlight and heat. Do not freeze the injection. Keep it out of reach of children. Always check the expiry date before use.

Packing

Megimine-2500 Injection is available in 2 ml ampoule. It is supplied with a disposable syringe as a Dispo Pack for safe and hygienic use.

Important Information

This Vitamin B12 injection should be used only under the supervision of a registered medical practitioner. Patients should inform their doctor about any other medicines they are taking. This product is contraindicated in patients with known allergy to Methylcobalamin or any ingredient of the injection.
