

# PHUP DSR Capsule

## Pantoprazole & Domperidone Combination For Acidity, GERD & Indigestion

**PHUP DSR Capsule** is an advanced combination of pantoprazole domperidone capsules designed for effective relief from acidity, acid reflux, GERD, and gastritis. It combines a proton pump inhibitor (Pantoprazole) with a domperidone prokinetic agent to provide fast and long-lasting relief from hyperacidity, bloating, and stomach discomfort.

Manufactured by Green Cross Remedies, it combines Pantoprazole (40 mg) and Domperidone (30 mg) to provide effective relief from acid-related disorders. This formulation is designed to manage symptoms of gastroesophageal reflux disease (GERD) and improve gastrointestinal motility.

### Composition

Each **PHUP DSR Capsule** contains:

- **Pantoprazole Sodium IP** equivalent to Pantoprazole 40 mg (*as gastro-resistant pellets*)
- **Domperidone IP** 30 mg (*as prolonged release pellets*)

*This dual-action formula ensures controlled release and better therapeutic outcomes.*

## Uses & Indications

PHUP DSR Capsule uses include the treatment of:

- Acid reflux disease (GERD)
- Hyperacidity and heartburn
- Gastritis and stomach inflammation
- Bloating and indigestion
- Nausea associated with acid reflux

It is widely used as an acid reflux medicine, GERD medicine, and gastric reflux treatment medicine.

### Specific Uses:

- **GERD:** Helps alleviate symptoms such as heartburn and acid regurgitation.
- **Peptic Ulcers:** Aids in the healing of gastric and duodenal ulcers by reducing stomach acid production.
- **Functional Dyspepsia:** Provides relief from bloating, nausea, and discomfort.
- **Nausea & Vomiting:** Effective in managing nausea related to various causes.

### Indications:

Indicated for patients with severe GERD symptoms, individuals suffering from peptic ulcers requiring acid suppression, those diagnosed with functional dyspepsia, and patients experiencing nausea where improved gastric motility is beneficial.

## Mechanism of Action

**Pantoprazole** belongs to the class of proton pump inhibitor capsules, which reduce stomach acid production by blocking the acid pumps in the stomach lining.

**Domperidone** acts as a prokinetic drug, improving gastric motility and helping food move faster through the digestive tract, thereby reducing nausea and bloating.

Together, this antiemetic and anti-acid combination provides comprehensive relief.

## Side Effects

---

Like all medicines, pantoprazole domperidone capsules may cause mild and temporary side effects:

- Headache & Dizziness
- Dry mouth
- Diarrhea or constipation
- Abdominal pain

*Seek medical advice if symptoms persist.*

## Contraindications

---

Avoid PHUP DSR Capsule if:

- You have hypersensitivity to pantoprazole or domperidone.
- You have severe liver disease.

- You have gastrointestinal bleeding or obstruction.

## Precautions

---

Use cautiously in elderly patients. Avoid long-term use without medical supervision. Inform your doctor if you are pregnant or breastfeeding. **Not recommended for self-medication.**

## Drug Interactions

---

This combination may interact with:

- Antifungal drugs & Antibiotics
- Cardiac medications
- Antacids (*timing adjustment may be needed*)

*Always inform your doctor about ongoing medications.*

## Expert Advice & Usage Guidelines

- Take exactly as prescribed by a health-care professional. Avoid skipping doses.
- To achieve optimal results, take the medicine on an empty stomach before meals.
- Avoid consuming alcohol, as it may worsen acidity and increase side effects.
- Maintain a healthy diet, avoid spicy and oily foods, and eat smaller frequent meals.
- Long-term or inappropriate use of acid-suppressing medicines may reduce effectiveness.
- Do not self-medicate or share this medicine with others.

### Storage Instructions

- Store below 25°C in a cool, dry place.
- Protect from direct sunlight.
- Keep out of reach of children.

### Pricing

PHUP DSR Capsule (MRP): **112.00** per 10 capsules.
