Rabeprazole Sodium and Levosulpiride Capsules Uses - RALE LS Capsule

RALE LS Capsule contains Rabeprazole Sodium 20 mg (Enteric Coated) and Levosulpiride 75 mg (Sustained Release). It is prescribed for persistent acidity, GERD, gastritis, functional dyspepsia, bloating, indigestion, and chronic acid reflux. This Rabeprazole Levosulpiride SR Capsule provides dual action relief by reducing excess stomach acid and improving gastric motility.

Composition

- Rabeprazole Sodium 20 mg (Enteric Coated)
- Levosulpiride 75 mg (Sustained Release)

Indications

- Gastroesophageal Reflux Disease (GERD)
- Hyperacidity and Heartburn
- Gastritis and Peptic Ulcer Disease
- Functional Dyspepsia
- Bloating and Indigestion
- Gastroparesis

Mechanism of Action

Rabeprazole suppresses gastric acid secretion by inhibiting the proton pump (H^+/K^+ ATPase) in stomach parietal cells. Levosulpiride enhances gastrointestinal motility through dopamine D2 receptor antagonism.

Dosage & Administration

- One capsule once daily or as prescribed
- Preferably taken before meals

Possible Side Effects

Headache, nausea, diarrhea, constipation, dizziness (generally mild).

Contraindications & Precautions

Avoid in hypersensitivity, GI bleeding, prolactin-dependent tumors, severe liver impairment. Use under medical supervision.

Storage Instructions

Store below 25°C. Protect from moisture and sunlight. Keep out of reach of children.
