

GREDOTT 100 CAPSULE

RACECADOTRIL IP 100 MG

Gredott 100 Capsule is a modern anti-diarrheal formulation specifically designed to manage acute diarrhea safely and effectively. Unlike traditional medicines that slow down bowel movements—potentially trapping harmful pathogens—Gredott 100 works by reducing intestinal hypersecretion. It respects the body's natural rhythm while restoring fluid balance rapidly.

PRODUCT COMPOSITION

Each Capsule Contains:

Racecadotril IP 100 mg

Widely recognized for effective secretory control and electrolyte management.

MECHANISM OF ACTION

Racecadotril acts as a selective **Enkephalinase Inhibitor**. It prevents the breakdown of endogenous enkephalins in the intestinal mucosa, which naturally reduces the excessive secretion of water and electrolytes. This non-opioid approach ensures diarrhea is controlled without causing rebound constipation or affecting intestinal motility.

KEY CLINICAL INDICATIONS

- **Acute Diarrhea:** Symptomatic treatment for adults.
- **Traveler's Diarrhea:** Rapid relief during gastrointestinal distress.
- **Supportive Rehydration:** Works synergistically with ORS.
- **Secretory Control:** Reduces watery loose motions.
- **Stool Volume Reduction:** Decreases fluid loss efficiently.
- **Pathogen Clearance:** Does not trap toxins in the gut.

KEY BENEFITS

- Provides rapid relief from acute diarrhea episodes.
- Reduces stool frequency and volume within 24-48 hours.
- Maintains normal bowel movement (Non-motility altering).
- Safe and well-tolerated profile for adult patients.
- Prevents secondary dehydration effectively.

Our Philosophy: At Green Cross Remedies, we believe in "Humanized Medicine"—treatments that work with your body's natural defense systems rather than overriding them.

DISCLAIMER

This information is intended for the use of Registered Medical Practitioners, Hospitals, Medical Stores, Pharma Agencies, Healthcare Professionals, Pharmaceutical Company Field Staff, and Pharmacies Only. **GREEN CROSS REMEDIES.**

DOSAGE & ADMINISTRATION

Standard Adult Dose: One 100 mg capsule three times daily (TID).

- Treatment should be continued until two normal stools are recorded.
- Effective results are usually seen within 3 days of consistent therapy.
- Always combine with **Oral Rehydration Therapy (ORS)** for optimal recovery.

SAFETY & SIDE EFFECTS

Gredott 100 is generally well-tolerated. Rare mild effects may include:

- Headache
- Nausea
- Mild skin rash

STORAGE INSTRUCTIONS

- Store in a cool, dry place.
- Protect from direct sunlight.
- Keep out of reach of children.

EXPERT ADVICE FOR SUCCESS

- Avoid skipping doses and maintain therapy as prescribed by your healthcare professional.
- Improper use of anti-diarrheals can mask underlying infections; reassess if symptoms persist beyond 3 days.
- Maintain proper hygiene and high fluid intake during diarrhea episodes.
- Discontinue use immediately if you experience itching, swelling, or difficulty breathing.
- Avoid alcohol and heavy, oily foods during treatment to facilitate faster gut healing.

FREQUENTLY ASKED QUESTIONS (FAQS)

Q: Is Racecadotril better than Loperamide?

A: Racecadotril does not slow down the gut (motility), making it a safer option with fewer risks of bloating or trapping infections compared to Loperamide.

Q: Can it be used for stomach infections?

A: Yes, it is commonly used for diarrhea caused by infections as it controls fluid loss while letting the body clear pathogens naturally.

Q: When should I stop taking Gredott 100?

A: You should stop once you have recorded two normal, formed stools.

MRP: Rs. 112.00
