

## Disodium Hydrogen Citrate Syrup

### Effective Urinary Alkalizer for UTI & Kidney Health

**Disodium hydrogen citrate syrup** is a widely prescribed urinary alkalizer used to manage urinary tract infections (UTIs), kidney stones, and conditions associated with high urine acidity. It works by neutralizing excess acid in the urine, thereby reducing irritation and discomfort during urination. This **urine alkalizer syrup** is especially helpful in relieving burning sensation, supporting kidney health, and improving urinary pH balance. It is commonly recommended as a supportive therapy in urinary tract infection treatment and kidney stone management.

#### Composition

Each 5 ml contains:

**Disodium Hydrogen Citrate** 1.2 gm

*This formulation makes disodium hydrogen citrate syrup a reliable alkalizing agent for urinary health.*

### Uses & Indications

**Disodium hydrogen citrate syrup uses include:**

- Relief from burning urination
- Management of urinary tract infections (UTI)
- Support in kidney stone treatment
- Reduction of urine acidity
- Relief in bladder irritation
- Prevention of uric acid crystal formation

**Disodium hydrogen citrate syrup is used for:**

**Urinary Tract Infections (UTIs):** URILICA Syrup helps alleviate the discomfort and pain associated with UTIs by neutralizing the acidity in the urine, making it less irritating.

**Dysuria:** Effective in providing relief from dysuria (painful urination). It helps soothe the urinary passage and reduces burning sensations.

**Cystitis:** Assists in managing cystitis, an inflammation of the bladder, by calming irritation and acidity in the urine.

**Kidney Stones:** The alkalizing effect may help in the management of certain types of kidney stones, particularly uric acid stones, by promoting a favorable urinary pH.

**Acidic Urine Conditions:** Indicated for conditions where urine acidity needs to be reduced, preventing crystal formation.

**Post-Surgical Care:** May be used as part of post-surgical care for urinary tract surgeries to manage discomfort.

#### Dosage & How to Use

**Dosage:** Usually 10–15 ml diluted in water, 2–3 times daily or as prescribed.

**How to Use:** Take after meals for better tolerance. Always dilute in a glass of water before consumption. Follow doctor's instructions strictly.

## Mechanism of Action

Disodium hydrogen citrate works by:

- Converting into bicarbonate in the body
- Increasing urinary pH
- Reducing acidity and irritation

*This helps in dissolving uric acid crystals and provides relief from urinary discomfort.*

## Side Effects & Safety

**Possible side effects may include:** Nausea, Vomiting, Stomach discomfort, Diarrhea (rare). *Most side effects are mild and temporary.*

### Contraindications and Precautions:

- Avoid in severe kidney impairment.
- Use cautiously in patients with hypertension or sodium restriction.
- Not recommended in alkalosis conditions.
- Consult doctor before use during pregnancy.

## Drug Interactions & Storage

**Drug Interactions:** May interact with aluminum-containing antacids. Can affect absorption of certain medications. Inform your doctor about ongoing treatments.

**Storage Instructions:** Store below 25°C. Keep in a dry place. Protect from direct sunlight. Keep out of reach of children.

### Pricing

**URILICA Syrup (MRP): Rs. 75.00 for 100 ml**
