

# ALLYDON TABLET

[www.greencrossindia.com](http://www.greencrossindia.com)

## COMPOSITION

### ALLYDON TABLET

Allylestrenol I.P. 5 mg

### Uses

Allydon (Allylestrenol) is used to help prevent miscarriage and recurring pregnancy loss, and may also be used to help prevent premature labour. It may also be used by male patients to treat benign prostatic hypertrophy. It should be noted that it is ineffective in treating a threatened pregnancy caused by placental dysfunction.

### Dosage and Administration

Always use Allydon (Allylestrenol) as you have been prescribed by your doctor. Never self-medicate or change your dosage without first consulting your doctor. The correct dosage can vary depending on your health, medical history, and the severity of the condition being treated.

The tablets should be taken orally. Patients should consult their doctor before taking this medication in order to determine the correct dosage. You should only take this medication as directed, and never exceed the dosage prescribed to you by your doctor.

### Side effects

Side effects of Allydon (Allylestrenol) include those listed below. If any of these effects persist, or worsen, you should consult your doctor immediately.

- Diarrhoea
- Acne
- Drowsiness
- Insomnia
- Depression
