### **Maintaining an active lifestyle**

Cartilage and bone health are important for long term wellbeing. Tablets has been developed by nutritional experts and provides unique combinations of trace minerals, vitamins and nutrients, ideal for those with an active life, in sport or in later life.

### **Vital Nutrients for Firm Joints**

Tablets contains Collagen (Type II), Glucosamine, Chondroitin & other essential vitamins and minerals which are required to maintain healthy joints.

### **Collagen (Type II)**

Tablets provides a high-grade collagen which is hydrolysed to improve absorption and unlike some sources of collagen it contains high levels of the key amino acid hydroxylysine.

Collagen is a structural protein found in several connective tissues in the body including bones, cartilage, gums, skin, tendons and blood vessels.

### **Glucosamine & Chondroitin**

Tablets contains Glucosamine present in the preferred potassium form, and a high quality LMW (low molecular weight) form of Chondroitin.

### **Trace minerals and Vitamins**

- Vitamin D helps to maintain normal bone health. Vitamin D is provided in its Cholecalciferol form as naturally produced by the body on exposure to sunlight.
- Vitamin C contributes to normal collagen formation to ensure proper functioning of the cartilage.
- Copper contributes to the maintenance of normal connective tissues and therefore can be beneficial to cartilage (as cartilage is made up of connective tissues).
- Zinc and Manganese help to maintain normal bone health.
